REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the specific combination of features set forth in the claims. The class of materials recited (GaInNAs, GaInNSb) is in general known, but the claims recite specific composition ranges, which give the substantial advantages associated with controlling band curvature and electron density, as discussed in the specification. See, for example, the paragraph spanning pages 11-12. These advantages accrue specifically for the channel layer in the type of field effect transistor set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The references listed on form PTO 892 teach GaInAsN or GaAsN.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Crane, whose telephone number is (571) 272-1652.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist, whose telephone number is (571) 272-1562.
